PALM OS Emulator Installation Manual

1) Download the software

SPEED 2009 operates on Palm OS devices and on palm OS Emulator for desktop computers.

The *Palm OS emulator for SPEED 2009* and the *SPEED 2009 software* can be downloaded free of charge after registration at www.thrombus.fr

2) *Palm OS Emulator* Installation

The archive contains a version of Palm OS Emulator configured specifically for SPEED. The content of the archive must be extracted in the root directory of the disk **C:**

After extraction, use your favorite file explorer and navigate to **C:\SPEED2009**. Then, double-click on **SPEED2009.exe** to start the *Palm OS Emulator*. Don't forget to adjust time and date settings.

To quit the *Palm OS Emulator* use **Alt+Q** or right-click and select **Exit**. Your session will be automatically saved on emulator exit. The emulator works exactly like a standard palm.

When user input is required you can use the keyboard of your computer to supply data.

3) Installation of SPEED Software on *Palm OS Emulator*

The archive contains the SPEED program (**speed2009.prc**) and its database files (7 **.pdb** files).

To install SPEED on the emulator you will have to follow these steps:
1. download the SPEED software
2. Extract the archive
3. Start the *Palm OS Emulator*.
4. Drag and drop the *.prc* file and all **.pdb** files onto the emulator.

Installation for updates

Users will be informed of updates by email. The updates will be available for download from the personal "Profil" zone on http://www.thrombus.fr.

To install an update follows steps 1 to 4. At step 3, once the emulator is loaded you must exit the speed application by clicking on the **house** at the bottom of the palm or the **app->quit** menu from the login screen or the screen with the list of patients.
